

Project Design Phase-I
Proposed Solution Template

Date	23 October, 2023
Team ID	592463
Project Name	Psycare
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	A model to predict the risk level (regression) of mental health problems in a colleague and provide subsequent solutions for each range.
2.	Idea / Solution description	We propose to create a web application using machine learning that predicts the level (percentage) of mental health degradation in a person and provides solutions for it.
3.	Novelty / Uniqueness	Our web application will provide credible solutions from certified counselors.
4.	Social Impact / Customer Satisfaction	Mental health is one of the leading problems in today's world. We attempt to provide the necessary help in order to make lives better and happier.

5.	Business Model (Revenue Model)	The web application can provide advertisement space to buyers. In the future, we aspire to connect mental health professionals with the subscribers.
6.	Scalability of the Solution	The trend in mental health issues is ever increasing and it is only expected that it will grow with time. Therefore, we expect that our model's usability and scope will surge.
